

# Urban-LEDS project

## Saldanha Bay Municipality City Developments and Experiences

### Low-carbon development: planning & actions implemented

LED and CFL spotlights and LED solar panels lights 2012/2013

Low pressure Solar water geyser homes 2010/2011

Geyser installations from Eskom radio controlled to switch off between 18:00-20:00 to assist with load shedding and protect maximum demand 2009 – Current

Recycling facility at Waste Plant in Vredenburg 2012-Current

#### Impacts / Results

- Reduce electricity usage and production
- Recyclable materials are recycled and not “dumped”
